Hygienic Solutions

Hygienic Solutions

Storsack is one of the main supplier's of FIBC's to the food and pharmaceutical industry. Over the past decade we have been at the forefront in shaping market developments through design and setting the standards within industry that have become widely adopted.

Our philosophy

We recognise that it is our responsibility to ensure that we embrace the 'due diligence' process by carrying out continual improvement programs which cover all areas of manufacture, storage and distribution of our products to the food and pharmaceutical industry. As a vertically integrated manufacturer, we directly control all of the processes involved in the production of our FIBC's.

To ensure compliance to the relevant standards, Storsack has a dedicated Research and Development team who, regularly commissions hygiene audits to satisfy legislative requirements.

This audit process ensures the continual on going review and improvement of our premises and working practices.

The "due diligence" incorporates the following unique code of practice:

- Conformity to FDA and EC Directive 2002/72/EC and amended directive relating to plastic materials and articles intended to come into contact with foods.
- Inspection of facilities by customers.
- Ongoing surveillance and confirmation of the follow up of corrective actions on nonconformance to the relevant standards thus ensuring that a self-improving quality, hygiene and product safety system is maintained

Benefit to the Customer

Our unique approach ensures that we take full responsibility for compliance of the product we supply.
